

# Digression #10

## Build a Multi-Generational Family Circle based on Blood, not Beliefs.

### The Communication Technology that

**drives A.I.** has made it possible to have multi-generational Face Time when we are physically miles apart, in a different Time Zone, or perhaps even in different Nations — and engaged in unrelated activities.

**A Family** can still be a-Family as long as they share-the-understanding that we are unique Human Beings directly connected/related by Blood, not isolated by ideology or politics. We don't even have-to speak the same language.

*Constructive/Productive **Communication** with Family, Friends, similarly-inclined, or potential associates has never been easier, more convenient or more affordable.*

*Plus: **Grandparents and Parents** can keep-in-touch with their Progeny via an Interest-in-Common (i.e., *How-Best-to-live in the World we live-in*) regardless of relative locations via FaceTime, Google Meet, Zoom, etc. And, even the Unrelated can build Social-Ensembles based-on similar-interests and **What-we-might-like-to-do**.*

### Retrac.com's "The Art of Being-Smarter"

**Retrac.com** can be the exploratory host of a family's Brain-Storming session.

*"The Art of Being Smarter"* applies to all *Homo Sapiens Sapiens in Extant extended*, who live in an evolutionary World — giving us Humans many options for common denominator possibilities that can be the nucleus for a Family Circle.
