

Digression #8: Why U.S. Schooling Fails

— its Students + their Parents + their Community + the USA.

"A new type of thinking is essential if mankind is to survive and move toward higher levels." ALBERT EINSTEIN

Since 1980, U.S. Universities are the worst time-and-money-investment for students + parents + taxpayers — ever conceived by the Mind of Man.

The average BA now cost 6 years of a Student's life and \$2,000,000 of the Students' + Parents' + Local/State/ Federal Taxpayers' Money. Less than 50% will be recovered from the average graduate's lifetime of paying Taxes.

U.S. Schooling, like Religion and Culture, has become Tribal. It became Tribal when Universities claimed credit for the GI Bill-based graduates' noticeably superior workplace performance when compared to previous college graduates. The fact that GI Bill-Students were adults was conveniently overlooked.

Schooling's Tribal inception started in 1960. Today U.S. Schooling Tribalists are as protective of their parasitic prerogatives as any Cult in History.

When students don't conform and comply and cogitate cognitively, they are told there is something wrong with them that must be corrected — or Good-bye. The U.S. has the highest incarceration and recidivism rates in the World.

We have capable/competitive People. We must stop stifling the development of their Intelligence. **Street Smarts** must replace **School Smarts** in 24% of the U.S. Workforce if the USA is to Survive and Thrive during the Age of Automation, and Beyond.

We can identify potential Competitors by: **1) Their Medical history:** a) That ADHD is the first sign of superior Human Intelligence is a Scientific Fact. b) Student-PTSD is caused by exactly the same perceived Situation and Circumstances as Military-PTSD. Both are the results-of normal reactions of our Human Physiology. c) Drug use and Cell-phones in Class identify **Smarter-students** who are bored.

FAILURE

The Formula for success in U.S. Universities is: 3Rs2C

(Rote - Regurgitate - Replicate - surmise + Conform and Comply — and certifies students' conformance with Diplomas and Degrees of Incompetence.)

2) Academic Records: Students with GPAs below 3.2 and still going to Community College or Adult Ed may be the best prospects for staffing a **Can-do** competitive + Adaptive County, City, Community Age of Automation Workforce — if, they are shown How-to **DIY > Ys-ly** and have access to the-References + the-Resources + the Strategic Planning Techniques + Coaching + Mentoring to do it.

The light at the end of the U.S. Tunnel of Industrial Competitive Capabilities — powered **Cognitively** — is-flickering. We can restore Wattage and Voltage by updating our intellectual Generators, adding the power of **Ambient Intelligence > Ys-ly** and begin to generate Actual Intelligence that can compete in the Global Economy. Updating can begin here —

SUCCESS
