

Why we are • Who we are Our Cerebral Cortex — Is our IQ Controller —

*In the Beginning was the Word that signifies the Divine Order, Reason and Light for becoming a **Consciously Consequential Adult** American Human Being. THE GOSPEL OF JOHN 1:1*

Human Intellectual Capabilities

—vs.—

A.I. Intellectual Capabilities is a no-Contest

The absolute-best that Computer-driven **A.I.** can-do is report published information or emulate the intellectual capabilities of a 10-year-old, non-Precocious, pre-Puberty Human Child.

Today, 2026, America's Industrial Future is **Foggy**, not **Cloudy**.

*"By failing to Prepare, you are preparing to fail."
Ben Franklin*

Our Human Intellectual Capabilities –vs.– A.I. Intellectual Capabilities is a no-Contest (Page 2)

To build a Computer System that can match the potential *intellectual capabilities* of an adult American will require a Network of 21 separate input computers, each with a gradient response dependent-on-functional-development to a particular situation or circumstance, bi-directionally networked to each-other — while simultaneously connected-to and feeding 1 Master Brain and 5 Knowledge/Experience-based Brain Computers with independent Memory Banks operating in Empirically Syncopated Harmony. Unfortunately, when you turn-it-on — *the-lights will go out on the Eastern Seaboard.*

The collective functionality of our sensory perceptions processed by our Brains and their Memory Banks comprise our Human Intellect and create our Potential, our Perceptions, our Perspectives that reflect our Empirical Context and dictates our Behavior — that can-project superior Capabilities and Competencies. Superior Capabilities and Competencies increase our Career Options + Opportunities + in-pocket Cash Flow.

The Master Brain (*aka: Reptilian Brain*) controls our Physical functionality: Is gender-based + fight/flight oriented and-can and-does override/immobilize the 5 other Brains by flooding them with Feelings and can-put our Emotions in control of our Behavior.

There are **2 basic types of Thinking** inherent among Humans that can be Tested, Evaluated, Compared and Ranked.

- (1) Human's XX Chromosome-built DNA generates **Cognitive Intelligence** and its **Critical Thinking** that focuses on Repetition: What was + Uniformity + Replication + Preservation via the

3Rs+CC+Subscribe (Rote - Regurgitate - Replicate -surmise + Conform and Comply) = SOP.

Cognitive Intelligence dominates our Culture in the USA today — which is Why we are losing the Global Economic competition. So says the rising U.S. National Debt + decreasing Foreign Trade, the U.S. growing Industrial Unemployment Rate and the declining standard of living for 80% of Americans.

- (2) Human's XY Chromosome-built DNA generates **Ambient Intelligence** (Am-IQ) and its **Contextual Thinking** that focuses on Comprehension: What is-actually; What can-be-actually; What should-be-actually + Adaptation, Adoption, Empirical Evolution. Unfortunately, in American Schooling, People who-don't display **Cognitive Intelligence** based Perspectives and Practices (SOP) are considered to have Mental Health Issues and declared **Autistic**.

Actually, ADHD is sign of Am-IQ superior intellectual potential. Albert Einstein didn't speak until he was almost 5 years old. He was too busy trying to discover: What he was? and Where he was? and Who are these people around him? and What is happening to me?

Today Albert Einstein would be judged **Autistic**, drowned in Ritalin and judged Mentally Deficient. Which is why the SAT + ACT Tests have had-to-be dumbed-down over 70% since 1967 to maintain the median score of 500 in the SAT.

Computers Binary-based Processing can only compete with our Human Analog-based Processing because our Human Processing has been successfully stifled and dumbed-down by U.S. Cognitive Intelligence driven Matriarchal Schooling

The absolute-best that Computer-driven **A.I.** can-do is report published information or emulate the intellectual capabilities of a 10-year-old, non-Precocious, pre-Puberty Human Child. Today, 2026, America's Industrial Future is **Foggy**, not **Cloudy**.

=> Elementary = 8 years + High School = 4 years + Community College = 4 years +/-or University/ College = 6 years + Certifying PhD Androids/ Automotons = 2 years for a total of 24 years of U.S. Academic Schooling at America's Public + Cultural + Competitive + Intellectual Expense. U.S. Schooling has sold Americans a **Pig in a Poke**.

The U.S. Literacy Rate is ranked 16th in the World and 38% of the U.S. Electorate did not vote in the 2024 Presidential Election. Trump = 32%; Harris = 30%; Did not vote = 38%. For these results, American Taxpayers pay over \$1,000,000+ per-student's University Bachelors Degree with an average lifetime Income Tax potential of \$500,000. *It's simple Arithmetic!*

"Clicking" on Retrac.com indicates that you have above-average **Curiosity** and could be a candidate for becoming a 21st Century **Y's-American-Maverick**. If so, you may want to start-by joining our Volunteer **i4A Advisory Committee**, whose members Read/Critique individual Sections of Retrac.com to see if they think the individual Section is sufficiently DIY + comprehensible + obviously useful — and can-be used **FREELY**.

Individual Critiques can earn **Free tickets** to our **"Sunday Gatherings"** if they include Empirical Suggestions for improving communication. Empirical Solutions seem-to start by following Horace Greeley's (1860) advice *"Move West for opportunity and grow up with the country"* — so the first **National A.I. Rodeo** will be held-in LA County, California.
