A Plan-B for Americans = *The Art of being-Smarter*®
(Obviously + Congenially + Collaboratively)

We Humans can use this test to find out **how Smart** we are. This is not an I.Q. Test. I.Q. Tests measure our *Cognitive Intelligence* as manifested in our Memorization Skills. A **Smart Test** measures our Initiative + Coalescing + Ensemble-building Skills. How well we can apply/use the information that we have memorized => **The Art of being-Smarter™**.

Our "How Smart Am-i?" Test is a Can-Do Test that has 16 performance levels (Connections, aka "Dots") and can have a 3% error factor. How many Connections can you make? Level #1 = 1–6 Dots; Level #2 = 7–12 Dots; Level #3 = 13–16 Dots (32 Possible Dots). See Comp-Scale on Retrac.com's ***Intellectual Acuity Chart***.
