

Profiles in Uselessness

*U.S. Universities/ Colleges and their Protégés (School Districts), have truly become where the **Uninitiated** teach the **Uninformed** to-become **Unproductive**.*

U.S. Research Universities are America's Achilles Heel

The Carnegie Classification of Institutions of Higher Education in the United States designates Academic Institutions that spend on average at least \$2.5 million on research and development annually and grant PhDs (*PhD=Piled high and Deep*) as **Research Universities** that unfortunately have a **tenuous** connection to Reality, as does their Research.

University Research examines => What-has-been as isolated instances for non-Profits and Public Institutions — *circulating Public Funds* — to create the illusion of usefulness of pedagogical Parasites. No U.S. University Research has ever produced a tangible, measurable ROI. U.S. Universities and their attendant School systems are all burdened by the-Past and What-has-been => *maybe*.

U.S. K-12-16-20 Schooling/Education — like Religion and Politics — is where the Duplicitous live-off the Gullible.

The most successful **Cognitive Intelligence** based Community in the World is a 34,000 year old Termite Mound whose Structure, Operation and Functionality are emulated by U.S. Universities.
(Except U.S. Students walk-upright and have opposable thumbs.)
